OFFICE AND WORKS

JAMESTOWN, NEW YORK

Our trade-mark on any tool is a positive guarantee of best material and workmanship in every detail.

THE MATTHEWS-NORTHRUP WORKS, BUFFALO, CLEVELAND AND NEW YORK

PRICES, TERMS, ETC.

THIS catalogue supersedes all previous issues. Prices on all Crescent Tools, except Simplex Pliers, are net cash. We rely upon the dealers to maintain these prices. Discount sheets sent to the trade only. Prices subject to change without notice.

TERMS

Cash in thirty days from date of invoice. Two per cent. cash discount allowed if paid within ten days. Positively no cash discount allowed after ten days from date of the invoice.

REFERENCES

Unless satisfactorily rated in commercial agencies cash or satisfactory references must accompany your order.

GUARANTEE

Crescent Tools are Guaranteed to be satisfactory in every respect. We authorize dealers to replace or refund the purchase price of any Crescent tool that does not give satisfaction; the purchaser to be the judge.

CRESCENT TOOL COMPANY
JAMESTOWN, N. Y.

WHY CRESCENT WRENCHES ARE BEST

THERE are reasons for the superiority of Crescent Wrenches. We use the highest-grade Crucible Analysis Carbon Steel. Then we subject it to our own special heat-treating process for hardening and toughening.

This is a real heat-treating process whereby the pores of the metal are knit closely together and the surface hardened, adding wonderfully to the strength of the steel. This process should not be confused with the ordinary "case hardening," which leaves the interior of the metal porous and brittle, causing the tools to break easily; sometimes just from being dropped.

Best material, special heat-treatment, correct design, expert workmanship, and unusual care in finishing are the features that make the Crescent Wrench superior to all others.

Crescent Wrenches will stand more wear and more hard usage and abuse than any other wrench manufactured.

We are the originators of this style wrench and all genuine Crescent Wrenches bear our name in large letters on the handle. Look for it.

CRESCENT TOOL COMPANY
JAMESTOWN, N. Y.

CRESCENT ADJUSTABLE WRENCH

THIS wrench follows in outline the solid 22½ degree Engineer's wrench, which is the most serviceable of all solid wrenches. It can be used in practically every opening where a solid wrench can be used.

The Crescent Wrench is made from the highest-grade Carbon Tool Steel, hardened and toughened by our special heat-treating process, and is the *strongest and most efficient wrench made.*

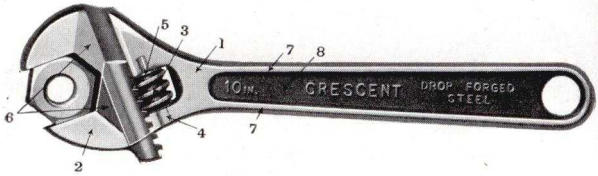
One Crescent Wrench will take the place of a number of solid wrenches in the tool kit. The ten-inch Crescent takes the place of nine sizes of solid wrenches; the other sizes in proportion.

For use around an automobile, gas or gasoline engine, motor boat, machine shops, and in fact any place where a wrench is required that will take various sized nuts, the Crescent has never been equaled.

GUARANTEE OF STRENGTH

Each Crescent Wrench is Guaranteed to exceed in strength the largest bolt, the nut of which is within the size of the wrench.

CRESCENT ADJUSTABLE WRENCH



CONSTRUCTION

THE handle (1) of the wrench is drop-forged from the best carbon steel, hardened all over. The increased width of the handle towards the end is designed to fill the hand more comfortably. A hole is provided in the end of the wrench for hanging the tool on the engineer's board.

The movable jaw (2) has a large bearing surface in the handle and when in use tends to lock itself on the handle, thereby relieving the strain on the thumbscrew. It is made from special alloy steel showing four times the strength of ordinary steel.

The thumbscrew (3) can be turned by the thumb of the hand holding the wrench and the opening easily adjusted. A small spring washer (5) acts with slight friction on the thumbscrew to retain automatically the adjustment of the wrench when thrown on the floor or the bench.

The braces (6) to the jaws are designed to secure the greatest possible strength and form an opening to fit a hexagon nut. The ribbed handle with the center web (8) gives maximum strength for weight of material.

The entire wrench is carbonized, hardened and oil-tempered. Polished wrenches are polished all over except the web in the handle, which is black oil finish. Nickel finish styles are heavily nickel-plated and buffed with web handle dull satin nickel.

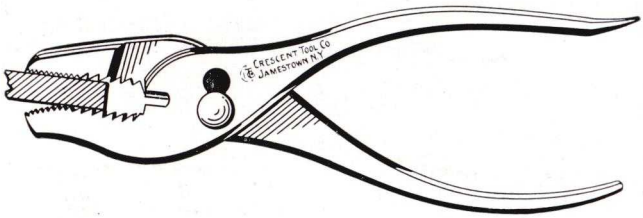
CRESCENT UNIVERSAL PLIERS

THE Crescent Universal is a plier of unusual design and of greater efficiency and general utility than any other plier made.

The curved lower jaw will force any object against the straight upper jaw for its entire length or breadth. This gives a greatly increased bearing surface and a corresponding increase in efficiency.

The straight jaw has a groove for holding wire and rods parallel with the jaws. See illustration on opposite page. There is also a convenient wire cutter and screw driver.

It is especially convenient to the automobilist or any one who has to handle all kinds of odd-shaped screws, pins, dowells, etc., as illustrated on the opposite page.



CRESCENT UNIVERSAL PLIERS

SIZE	WEIGHT	PER DOZ. BLACK	CODE WORD BLACK	PER DOZ. NICKEL	CODE WORD NICKEL
7 in.	9 oz.	$5.40	GEORGE	$6.00	GERMAIN

CRESCENT Universal Pliers are conceded the first place in quality among all tools. They are made from high-grade steel, drop forged and properly hardened. Accurately machined and beautifully finished in black or nickel.

Made in one size only — the 7-inch. Packed one in a box. No chance for shelf wear.

CRESCENT COMBINATION PLIERS

EVERYTHING that our years of study and experience have taught us about tool making we have put in Crescent Combination Pliers in order to make them the best that money can buy. They are drop forged from the finest tool steel, oil tempered and hardened by our special heat-treating process. They are beautifully hand finished and show care and quality in every line. For such of your trade as wants the best you can recommend Crescent Combination Pliers.

By a quarter turn of the handles and sliding from one hole to the other, which is done instantly, they change from the size of a gas burner to a $\frac{3}{4}$-inch pipe and from $\frac{3}{16}$ round to one inch round or square.

Crescent Combination Pliers are adapted to many purposes. They are exceedingly useful household tools and are indispensable for plumbers, gas fitters and machinists. They are most carefully made, reliable in every respect, and will stand more hard service than any other plier manufactured.

SIMPLEX Combination Pliers are the same general design as the Crescent Pliers. We make these pliers to supply a demand for a handy, household tool for general use and to be sold at a price lower than the Crescent Pliers. They are drop-forged from a 60-carbon crucible analysis, open-hearth steel, oil-tempered, hand finished, and unconditionally warranted satisfactory.

These Pliers, like the Crescent Pliers, are so made that by a quarter turn of the handles, they can be used on a wide range of sizes of either round pipe or nuts.

Made in 5, 6, 8, and 10-inch sizes, as illustrated. Each size is made in black and nickel finish. The black finish styles have heads polished.

LIST PRICE

SIZE	WEIGHT	CAPACITY	PER DOZEN	CODE WORD
5 in.	3½ oz.	¾ in.	$2.40	Malcom
6 in.	8 oz.	1 in.	2.40	Manley

Nickel Finish only

To meet a demand for a guaranteed tool at a low price we have brought out the CeeTeeCo, which is a high-grade tool, drop forged from sixty carbon open hearth steel, but machine finished instead of hand finished.

The machine finish does not give the high polish of the hand work but makes a very satisfactory and rust-proof finish for all-around work.

The slip joint permits of a wide range of sizes in either round pipe or nuts. CeeTeeCo Pliers are made with cross-corrugated handles, which insures a perfect grip without hurting the hand. They are accurately machined with drilled holes and milled teeth and for all practical purposes are the equal of any plier.

Packed one in a box and, like all Crescent tools, are guaranteed to give satisfaction or money refunded.

PACKED ONE IN A BOX

THE steel required for the making of high-class pliers must be of the highest quality. Open-hearth or ordinary crucible steel will not stand the severe service required for the lineman's tool, particularly when used for cutting heavy cable.

The durability of pliers depends on the steel used and in order to get the very best we have conducted exhaustive experiments and tests to select a superior steel. The steel used on our pliers is the result of our efforts and we believe it is the best procurable, regardless of cost.

Crescent Pliers are warranted not to chip or crumble. They have large throats and are easy cutters. The heads are polished and the handles are blue oil finish.

SALES AIDS

OUR advertising department is always at the service of dealers. The following pages illustrate and describe some of the means we have provided for dealers to call attention to the merits of Crescent Tools.

This advertising is all furnished free of charge and its use will mean more tools sold, to our mutual benefit.

FREE MOVING PICTURE SHOW SLIDES

We have had a number of requests from our customers for slides for moving picture show advertising and are now able to furnish any of the slides listed on the following pages, with the dealer's name *printed* at the bottom.

They should not be confused with the slides so often seen that have the name stenciled on the bottom, as all our slides are mailed direct from the manufacturers to the dealer and the dealer's name is *printed* on at the factory.

When ordering, please give the name of the slide wanted as it appears under the cut.

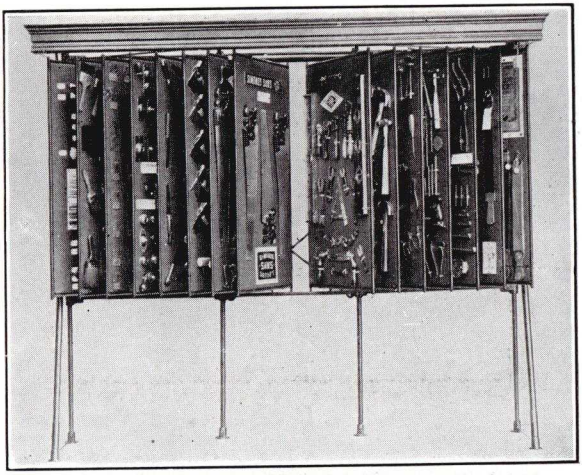
MULTIPLEX DISPLAY FIXTURES



FOR the convenience of dealers using the Multiplex Display Fixture, manufactured by Multiplex Display Fixture Co., 918 N. 10th Street, St. Louis, Mo., we are prepared to supply a Multiplex Display Leaf, size, 27 x 45 inches, mounted with the full line of Crescent tools in Nickel, Polished and Black finishes. The tools are mounted on both sides as shown on next two pages.

This is not a general display board and can only be used with the Multiplex fixture. For a general display board see page 24.

The only charge is for the tools, which are billed at the regular discounts and terms, and the display may be retained as long as desired or until 30 days notice is given by either party. Credit or refund of full purchase price will be allowed when the complete display is returned.

MULTIPLEX DISPLAY LEAF

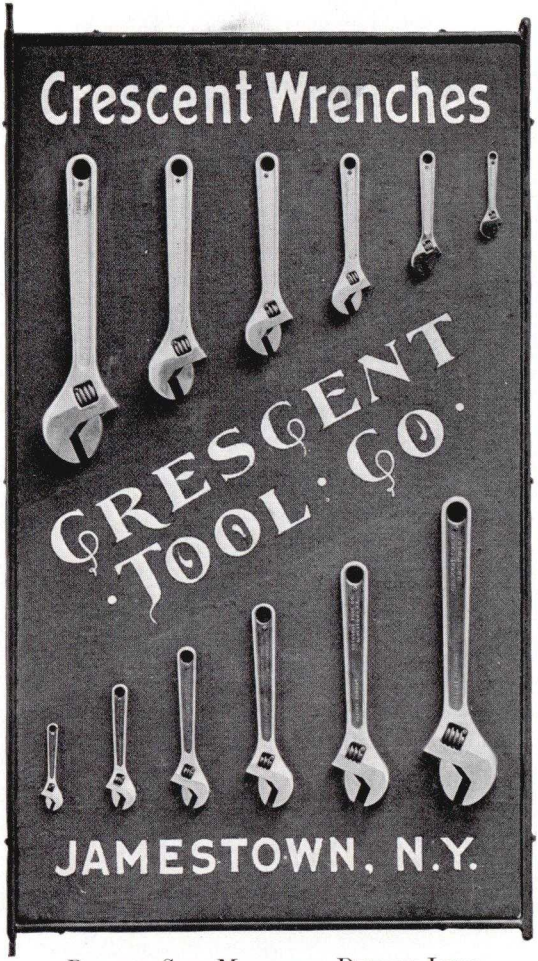
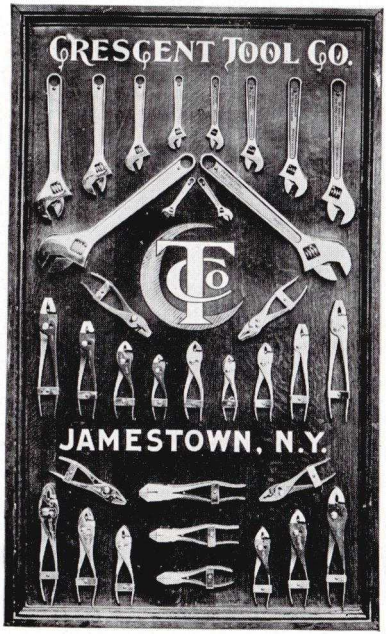
MULTIPLEX DISPLAY LEAF



REVERSE SIDE MULTIPLEX DISPLAY LEAF

GENERAL DISPLAY BOARD



SIZE 30 x 51 INCHES

To those dealers who do not have the Multiplex fixture and still wish to make a display of our tools, we will furnish a general display board of golden oak, mounted with the full line of Crescent tools as shown in the above photograph.

They will be supplied on the same terms as we supply the Multiplex leaves.

ADVERTISING CUTS OF CRESCENT TOOLS

FOR the convenience of our customers, and especially those issuing catalogues and circulars, we have a series of cuts suitable for printing on any paper ordinarily used for such work, and illustrating our entire line.

Electrotypes for advertising will be furnished to dealers without cost to them.

In ordering any of the following cuts, please use both the number and the letter appearing under the cut desired. The same article is shown in various sized cuts. Therefore the necessity for this numbering.

CIRCULARS FOR ADVERTISING

CIRCULARS are one of the best and at the same time one of the cheapest forms of advertising, if properly used.

A circular enclosed with each statement sent out on the first of the month will mean that a piece of your advertising will get into the hands of every customer having an account with you, and will produce results.

We will print your name on the front page of any of the following circulars and send them to you free upon request.

When folded for mailing or distribution they measure $3\frac{1}{4}$ x 6 inches.

THE CRESCENT WRENCH
THE UNIVERSAL PLIER
THE CEETEECO PLIER
THE MOTOR KIT PLIER
THE SIMPLEX PLIER
THE THIN BENT NOSE PLIER

When ordering please name the circular or circulars you wish, and how many you can use to advantage.
